- IslandPresents' supports a flexible network licence manager. You can install a licence on a specific machine, reserve it for a frequent user or create a pool of licences which occasional users on a network can share.

Present yourself in style.

New

ISLAND PRESENTS, TABLE & CHART™

New from Island Graphics is IslandPresents' Table & Chart. This latest product in the Island Productivity Series allows Sun workstation users to create finished, full-colour 35mm slides, overheads and on-screen presentations with a mixture of text, graphics and sound.

Island Presents' Table & Chart features an Outliner for creating and organising a presentation. With the Slide Editor and Organiser, handouts and speaker notes are an easy task. In addition there is a Chart module for creating business graphics and symbolic charts. A Table module allows users to create tables which include text and graphics while the spell-checker provided will ensure your presentation is accurate as well as attractive.

To make getting started even easier, Island Presents' Table & Chart includes 90 professionally produced slide templates and a clip-art compact disc holding 1,100 vector-based images which can be edited and imported to add real style to your work.

Fully compatible with IslandWrite®, Draw & Paint.

English version now available. French and German early 1993.

ISLAND WRITE, DRAW & PAINT

Island Write, Draw & Paint is the best-selling graphical word processor and desktop publishing tool, voted "Product of the Year" by UNIX World Magazine. It contains an impressive array of features to make you look good in print.

Island Write, Draw & Paint supports the OPEN LOOK® graphical user interface and contains a WYSIWYG word processor and page-layout program as well as a raster editor for importing scanned black and white or colour images, and a vector image-based drawing program. All three applications can be used alone or combined to produce letters, reports, memos, newsletters, diagrams and other business communications.

Island Write is much more than a standard graphical word processor. With the advanced page-layout features, you can create single or multi-column freeform documents. Using the "templates" feature you can create and save all your daily page layouts including fax forms, letters and memos, or produce sophisticated templates to incorporate graphics for reports and newsletters.

Island Draw® is a vector-based drawing and illustration package. All drawings are resolution-independent, which means that they can be enlarged or reduced with no loss of information. Island Draw is ideal for producing organisational charts, corporate logos, floor plans and design system configurations. Images can be easily incorporated into Island Write documents.

Island Paint® offers both colour and monochrome raster image editing making it ideal for creating original art as well as touching up scanned images. Output from Paint can easily be included in Island Write documents.
